

Industrial robot

RoboInfil

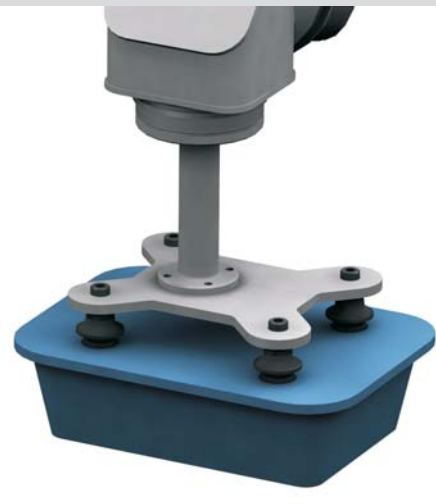

Packing with robots

We are your **competent partner** to optimise your packaging processes

Within the scope of industrial packaging processes there are economically important sectors with tasks difficult to automatize.

We combine classical packaging technology with modern industrial robots.

- Flexible infeed of products
- Product detection by camera systems
- Product tracking
- Grouping stations can be integrated
- Flexible suction and gripper tools
- Several modules in-line
- Separate safety circuits
- One touchpanel for an easy and comfortable operation of the entire equipment
- Short changeover times
